BOULDER, COLORADO – QSUM Biopsy Disposables, LLC, a privately held company based in Boulder Colorado, receives a new patent for the AccuFit® MRI Coil draping provided for various breast imaging coils. This is QSUM's Fourth patent. "QSUM prides itself in addressing customer needs through innovation, ease-of-use and optimal cost-efficiency"

This latest patent received, U.S. patent (US 8,473,027 B2), provides MRI Breast Coils additional protection from pathogens between the inside surface of the breast coils and coil pads and a patient's breasts. The coil covers reduce clean-up time; deliver quick procedure turn-around time; and provides additional patient comfort.

QSUM specializes in biopsy products for Stereotactic, Ultrasound, and MRI including trays and draping systems for Hologic/Lorad® and Fischer/Siemens® prone biopsy systems. Other accessory products are also available
