BOULDER, COLORADO (December 28, 2010) – QSUM, LLC, a privately held company based in Boulder Colorado, receives two draping patents. “QSUM prides itself in addressing customer needs through innovation, ease-of-use and optimal cost-efficiency” states Hudson Jones President of QSUM.

The first patent received is US7,775,213 B2, is a draping utilized on the Lorad® Multicare™ Prone Stereotactic Biopsy system.

The second patent received is USD622,389S, a protective drape covering the Sentinelle™ Magnetic Resonance Imaging breast coil device.

QSUM’s initial products were introduced in late June 2006. Customer incorporation of the products has been accepted by well known facilities such as MD Anderson, Park Nicollet, Oklahoma Breast Care Center, Cedars-Sinai Medical Center and many more.
