BOULDER, COLORADO (April 6, 2009) – QSUM, LLC, (www.qsum.net) a privately held company based in Boulder Colorado, announces that CIVCO (www.civco.com) has partnered with QSUM Biopsy Disposables to add new Interventional Draping products to the company's infection-control product line. The interventional patient drapes are made of completely absorbent materials, ensuring simple cleanup to maximize efficiency and turnaround time. These patient drapes are ideal for PICC lines, ports, CT biopsies, ultrasound biopsies, needle localizations, cyst aspirations and other interventional procedures.

QSUM specializes in biopsy and draping products for Stereotactic, Ultrasound, and MRI including trays and draping systems for Lorad® and Fischer/Siemens® prone biopsy systems.

ABOUT QSUM
