BOULDER, COLORADO (July 14th, 2008) – QSUM, LLC, a privately held company based in Boulder Colorado, announces the exclusive sales alliance with MRIequip.com for sales of the QSUM MRI Disposable Products. These include a specially designed MRI Breast Biopsy Tray that includes a non-ferromagnetic disposable scalpel and needle. Other new products include breast coil and headrest draping designed specifically for the MRI breast imaging market.

QSUM specializes in biopsy products for Stereotactic, Ultrasound, and MRI including trays and draping systems for Lorad® and Fischer/Siemens® prone biopsy systems. Other accessory products are also available including Ultrasound gels, sterile marking pens and sterile JACHO compliant labels, etc.

QSUM's initial stereotactic products were introduced in late June 2006. Customer incorporation of the products has been accepted by well known facilities such as MD Anderson, Rush University, Oklahoma Breast Care Center, Cedars-Sinai Medical Center and many more.
